**Horse and rider
treatment special:**

Until 31st January 2015

only \$80

**Save
\$30!**

Are you and your horse not performing 100% because of aches, neck, back or shoulder pains that restrict your movements that limit your or your horse's performance at work and during daily activities?

A Bowen treatment with Dewi may give you and your horse the relief you have been looking for

What is the Bowen Technique and how does it work?

The Bowen Technique is a non-invasive hands-on therapy that is very gentle, effective and completely safe for everyone of any age.

A Bowen treatment consists of gentle, rolling movements and can be performed through light clothing. Bowen moves are made at very specific points, which have a huge effect upon the way the body holds itself.

Many conditions usually improve with 1-3 sessions though 3-8 sessions may be required for more chronic conditions. Bowen is not only for aches and pains, it's also a great way to unwind from daily stress.

What Bowen clients are saying

"Dewi visited my new horse on the 10th June 2014.

Nicky is a 12 year old Appaloosa mare. she arrived with poor feet, overgrown teeth and a severe selenium deficiency which in turn had started to cause muscle wastage. These combined issues had caused her to be in quite poor condition, with poor movement in her back legs. I've never tried a bowen treatment on a horse before. I found Dewi very helpful in explaining what she was doing and why she was doing it.

Nicky really enjoyed the treatment, stretching and yawning. I noticed a change in her over the course of the 1 hour treatment. She was standing better on her hind legs and was able to square-up immediately, instead of us having to move her legs up for her. In the days after the treatment she has been moving better in her paddock and has a happier demeanor.

I'd highly recommend Dewi to any other horse owner, not only for her kindness and compassion towards the horse, but for the results I am already seeing after the first treatment.

Thanks Dewi!!! "

"Feeling frustrated coming back from the doctors with a bag of medicines prescribed for slipped disc and sciatica. They told me to lay on my back until the problem improved and to take two weeks off work. I could not afford to do this. After one Bowen treatment I was up and around the very next day! "
